

Math: Fractions (Halves, Quarters, and Eighths) Name: _____

Right. One pizza, half pepperoni, half peppers. One pizza with quarter toppings. 1 quarter pepperoni, 1 quarter peppers, 1 quarter pineapple, 1 quarter...pickles? That's weird.

Help Adi make the pizza into the correct fractions.

- 1) Divide one pizza into halves and one pizza into quarters
- 2) Draw the correct toppings on each pizza. (don't forget the pickles!)
- 3) Cut the pizza into eighths.
- 4) You did it! Great job pizza makers!

Use white paper plates to make an even bigger pizza!
